Data Matrix scanner test sheet

A4 · engine 2.0.1

Print at 100% ("Actual size"), not "Fit to page". Scan each code: your scanner should return exactly the text printed under it (T10 may also start with]d2). A miss on T3 (tiny) or T9 (DMRE) shows your scanner's limits.

This bar should measure 100 mm (3.94 in).
If it does not, the page was scaled when printed.

Every code decodes in independent software (zxing-cpp). This sheet does not grade print quality: that needs an ISO/IEC 15415 verifier.
